Flood-Resilient Infrastructure Development in Pursat and Kampong Chhnang Towns

Integrated Urban Environmental Management in the Tonle Sap Basin Project (ADB Loan Nos. 3311 and 8295; Grant No. 0454)

OUTCOME

Improved urban services and enhanced climate change resilience

OUTPUT

- Kampong Chhnang urban area environment improved
- Pursat urban area environment improved
- Community mobilization and environmental improvements implemented
- Sector coordination and operations support strengthened

ADAPTATION ACTIVITIES

- Flood protection through embankment construction and reinforcement, solid waste management, and road rehabilitation in Kampong Chhnang
- Drainage improvements, river embankment protection, and solid waste management in Pursat

- Community mobilization and environmental enhancement through improvements in household sanitation and in climate change and hygiene awareness and action, and the development of community-resilient small-scale infrastructure in pre-identified poor and vulnerable areas, including the use of early warning systems
- Support for sector coordination and operations with a view to developing a plan for climate change adaptation in urban areas around the Tonlé Sap River

PROJECT AT A GLANCE

Budget

\$52.6 million (PPCR, \$5.0 million grant and \$5.0 million loan; ADB, \$37.0 million; community, \$0.2 million; and government, \$5.4 million)

Target provinces

Pursat and Kampong Chhnang

Resilience instruments to be developed and tested

- Embankments to be constructed or improved in Kampong Chhnang, to strengthen ability to cope with floods
- Pursat drainage to be improved and extended
- Wastewater stabilization pond facility in Pursat to be rehabilitated
- Community-driven climate-resilient infrastructure to be developed in Kampong Chhnang and Pursat

Total beneficiaries (no. of women and girls)

90,000 (46,000)

Project approval date

10 November 2015

Project completion date

31 October 2022
