Progress report 2021

Sectoral indicators:

Infrastructure- Roads: Length and % of climate proofed roads constructed/Access all year round (116 Km of DBST road constructed in 2021),

Human health: % Households with basic sanitation (11% increase in 2021 from 67% to 78%) ,

Water resources: % Poor HHs with access to basic water supply services that are available all year round (59.7% in 2021, increase of 1.7%)

NDC actions:

- 1 action under implementation preparation
- 3 actions under implementation:

Finance:

- Conditional (requested) in the updated NDC up to 2030 : 1.4 billion USD
- 2021: 71.7 million USD (MEF, WB, ADB, China Aid)

Implementation in 2021

- Building adaptive and resilient capacity for MRD officers at national and sub-national level for mainstreaming climate change into rural development planning processes and technical design
 - BL: 13 officials trained- 175 (50 MRD+125PDRD) by 2030: 50 in 2021 (Kg.cham province)
- Rural road rehabilitation and improvement for climate change resilience
 - BL: 3000 DBST (km)-6000 DBST (km) by 2030, 116 DBST (km) in 2021
- Resilient and adaptive rural water supply and sanitation construction
 - BL: 73% water supply- 90% water supply by 2030: 1.7% water supply in 2021

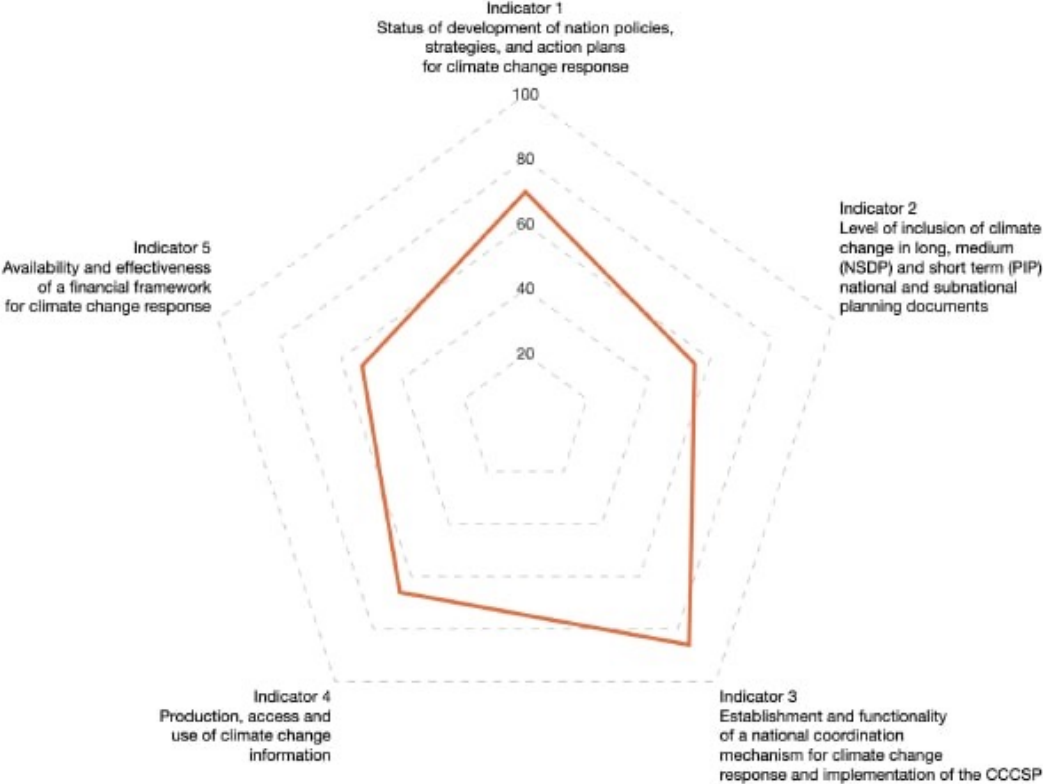

Cross-cutting issues: 2021

- Technology transfer: yes, available for all actions under implementation
- Gender:
 - 50% project beneficiaries,
 - 50% stakeholders in consultations, training participants on new technologies and adaptive water systems
 - 30%: those who received skills training,
 - 60%: those benefiting from social and economic facilities, observation and consultation, non-motorize road users are majority women. They often use roads to access social and economic facilities.
- Youth engagement:
 - 2/3 actions
 - The youth and children have been involved in road safety campaigns organized by the project after the road constructions.
- Private sector:
 - 2/3 actions
 - design and construction works
- Capacity gaps:
 - More trainings on climate change issues related to the road design and construction needed.

Readiness indicator

Next steps in 2022

- The action under implementation preparation:
 - Developing a training manual and providing training on approaches for development of climate-smart and sustainable livelihood to rural poor people
- Actions to be initiated:
 - Build adaptive capacity on climate change for village leaders (Village Development Committees, VDCs)
 - Integrated village development
- Challenges and opportunities:
 - Budget is still one of the major problem for us to implement action in NDC and well as in our CC action Plan.
 - Still need more coordination among all activities, programmes within MRD, and NGOs
 - We can see some of the actions, related to rural road improvement and Water Supply is in better position in term of funding, but not enough for other soft component.

Thank you!
