Background

- The CCCSP and sectoral climate change strategies can be implementable through action plans that provide the framework for operationalizing the action within the strategy.
- The Council of Ministers provided outlines for preparing policy, strategic and action plans.
- The development of the climate change action plan is the next step in the process.
- Building on the strategic planning process, CCD will provide guidance and support the development of the action plans

Approaching the CC Action Plan

- The climate change action plan is not meant to be ‘a stand-alone’ set of actions
- They should be integrated into the regular actions carried out by the line ministries.
- Working closely with the Department of Planning in relevant ministries
- This will be achieved by identifying climate change actions and mapping these actions to Private Investment Plan (PIP) and regular annual work plan of the line ministries.
- Building capacity of sectors to ensure that climate change is systematically considered in the planning of future projects (for example through climate change screening procedures for new projects)

Expected Output

- I. A climate change action plan for the concerned sector(s)

- II. Integration of climate change actions in the regular ministry programming process (PIP, Budget Strategic Plan, annual work plan)

Thank You
